

MOHAMMED SOFI SARMAD

DevOps & Cloud Engineer

Bengaluru, Karnataka | +91-9164876055 | mdsofisarmad@gmail.com | [GitHub](#) | [LinkedIn](#)

OBJECTIVE

DevOps & Cloud Engineering graduate (B.Tech, Electronics & Computer Engineering) with hands-on experience in CI/CD pipeline design, Docker, Kubernetes, Infrastructure as Code (Terraform, Ansible) and AWS, plus an AI/ML internship building LLM-powered automation workflows. Comfortable with Linux, Bash and Python scripting, and monitoring with Grafana. Seeking the DevOps Intern (AI Infrastructure) role to learn classical DevOps and the MLOps stack while supporting reliable deployment of AI services.

TECHNICAL SKILLS

Operating Systems: Linux (Ubuntu), Windows

DevOps & CI/CD: Jenkins, Git, GitHub, GitLab, CI/CD Pipeline Design & Automation, Git Version Control Workflows

Containerization & Orchestration: Docker, Docker Compose, Kubernetes (K8s)

Infrastructure as Code: Terraform, Ansible

Cloud Platforms: AWS (EC2, IAM, S3, VPC), Azure DevOps

Monitoring & Observability: Grafana, PagerDuty, System Monitoring

Scripting & Automation: Bash, Shell Scripting, Python, crontab

AI / ML Tooling: n8n, Google Gemini (LLM-powered workflows), Model Evaluation

Build & Deployment Tools: Maven, Apache Tomcat, Nginx

System Administration: Linux User & Permission Management, Agile Team Collaboration

INTERNSHIP EXPERIENCE

DevOps & Cloud Intern | DevOps Academy — onsite

Jul 2026 – Present

- Working on end-to-end CI/CD pipeline design and automation with Jenkins, Git and GitHub for continuous integration and deployment.
- Gaining hands-on exposure to Docker containerization, Kubernetes orchestration and AWS cloud infrastructure (EC2, IAM, S3, VPC).
- Practicing Bash shell scripting and Ansible for configuration management and deployment automation.
- Learning monitoring and incident-management workflows using Grafana and PagerDuty.

AI Research & Development Intern | Learners Byte — Remote

Jan 2025 – May 2025

- Contributed to AI/ML projects under the Bharat Unnati AI Fellowship (AICTE NEAT 6.0), including an LLM-powered AI Learning Coach (n8n, Google Gemini) and an AI-Powered CRM Assistant.
- Gained hands-on experience with automation workflows, model evaluation and data-driven development, skills directly applicable to MLOps and DevOps automation.

PROJECTS

One-Click Deployment CI/CD Platform / Jenkins | Git | GitHub | Maven | Apache Tomcat | PagerDuty | Linux

- Designed and implemented an end-to-end CI/CD pipeline enabling fully automated one-click deployment of Java web applications.
- Integrated GitHub Webhooks with Jenkins to automatically trigger builds on every code commit.
- Configured Maven for automated build, testing, packaging and artifact management.
- Automated WAR deployment to Apache Tomcat servers.

Infrastructure Automation and Web Deployment Using Ansible / Jenkins | Ansible | Terraform | AWS EC2 | Nginx | Tomcat

- Provisioned and managed AWS infrastructure using Terraform (Infrastructure as Code) for repeatable, reproducible environments.
- Automated server configuration and application deployment using Ansible playbooks.
- Deployed applications on AWS EC2 instances and configured Nginx/Tomcat servers.
- Automated end-to-end deployment workflows, reducing manual effort and ensuring consistent releases.

CERTIFICATIONS

- AWS Cloud Practitioner Essentials (May 2026)
- Oracle OCI AI Foundations Associate
- Infosys: Certified in HTML5 & CSS3
- Accenture Nordics Software Engineering Job Simulation (Forage, 2025)
- Deloitte Australia – Technology Job Simulation (Forage, 2025)

EDUCATION

B.Tech – Electronics & Computer Engineering VTU, Kalaburagi | CGPA: 8.0/10

2022 – 2026
